

Predator!

It's time to take a walk on the wild side! This half term, we'll invite some amazing animals into our classroom to discover how they move, what they feel like and what they eat. We'll also program a toy to move across a grid – will it be caught by a predator? We'll learn about the different parts of a plant and how some plants are predators! From our investigations about the human skeleton, we'll find out how muscle make the bones move. We'll investigate food chains and learn about how animals find their food. Using the internet, we'll research the majestic peregrine falcon and discover where crocodiles live. After our research, we'll create an exciting aquatic animation. At the end of the ILP, we'll show you a range of animal fact presentations, make animal collages and learn about the interesting (and disgusting) world of parasites!

Home Learning

Predators can be found in deserts, jungles, oceans or even in your own back garden! Why not go for a walk and see which animals and plants you can identify? You could also visit a zoo, thinking about which animals are predators and which animals might be their prey. Alternatively, put bird food in the garden to see if you can attract any visitors!

Curriculum focus	
English	Short stories, information leaflets
Mathematics	Place Value, Addition and Subtraction
Science	Food chains, fossils, plants, skeletal systems
Computing	Algorithms, flow diagrams, research
Geography	Fieldwork, using maps
Music	Musical Notations
PE	Competitive games
PSHE	Being Me in My World
RE	Christianity
